

Emergency & Life-Safety

Eyewash stations and safety showers activated, tested and audit-ready.

A WHAT IT TRACKS

Emergency eyewash stations, safety (quick-drench) showers and combination units.

C INSPECTION CADENCE

- Weekly activation (Z358.1)
- Annual performance inspection — every 12 months

B STANDARDS IT MAPS TO

29 CFR 1910.151(c)

Emergency eyewash / quick-drench (OSHA)

ANSI/ISEA Z358.1

Emergency eyewash and shower equipment

D HOW IT WORKS — THE INFINID MECHANISM

- **Two tags, cross-checked.** Every asset carries an active V-Tag plus a passive RFID tag, bound together in AssetWorx!. Each read reconciles the two — a mismatch flags tag-swap, tamper, or an uninspected item put back into service.
- **Intervals watched for you.** The platform tracks each inspection interval by time, use-cycles or hours, and fires pre-expiry alerts before anything falls out of date.
- **Hands-free location.** The active V-Tag runs on a Zigbee self-healing mesh, reporting zone-level location that settles in about 3–4 minutes — tags report themselves, no scanning required.
- **Certificates & open data.** It generates the certificate / register of examination on demand, and feeds your ERP, reporting and AI through an open REST data contract.

KEY DATA CAPTURED Station type, water supply (plumbed / self-contained), delivered flow rate (L/min), tepid-water temperature (16-38 degC).

\$1,200 / year PER MODULE • FLAT
