ASSETWORX! — ENVIRONMENTAL COMPLIANCE VIEW (SAMPLE)

A WHAT IT TRACKS

Hazardous-waste containers, drums and IBCs, plus secondary-containment and spill-kit equipment.

C INSPECTION CADENCE

- Weekly hazardous-waste container inspection
- Secondary-containment / spill-kit check — monthly
- IBC periodic retest — every 2.5 years (30 months)

B STANDARDS IT MAPS TO

40 CFR 262.16 / 262.17

SQG / LQG hazardous-waste accumulation (EPA)

40 CFR 264 & 265 Subpart I

Use and management of containers (EPA)

40 CFR 279

Management of used oil (EPA)

49 CFR 180.352

Requalification & periodic testing of IBCs (DOT)

D HOW IT WORKS — THE INFINID MECHANISM

- Two tags, cross-checked.** Every asset carries an active V-Tag plus a passive RFID tag, bound together in AssetWorx!. Each read reconciles the two — a mismatch flags tag-swap, tamper, or an uninspected item put back into service.
- Intervals watched for you.** The platform tracks each inspection interval by time, use-cycles or hours, and fires pre-expiry alerts before anything falls out of date.
- Hands-free location.** The active V-Tag runs on a Zigbee self-healing mesh, reporting zone-level location that settles in about 3–4 minutes — tags report themselves, no scanning required.
- Certificates & open data.** It generates the certificate / register of examination on demand, and feeds your ERP, reporting and AI through an open REST data contract.

KEY DATA CAPTURED EPA waste code, container type, capacity, accumulation start date, generator status (VSQG / SQG / LQG).
